About this document

This Target Market Determination (TMD) is required under section 994B of the Corporations Act 2001 (Cth) (the Act). This TMD describes the class of consumers that comprises the target market for the financial product and matters relevant to the product's distribution and review (specifically, distribution conditions, review triggers and periods and reporting requirements). Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is not a Product Disclosure Statement (PDS) and is not a complete summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the PDS for the product before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions which supplement this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS is available at www.perpetual.com.au.

Target Market Summary

The Perpetual Pure Microcap Fund - Class A (Fund) is designed for consumers who are seeking **Capital Growth**, are intending to use the Fund as a **Satellite allocation** within a portfolio, have a minimum investment timeframe of **7 Years or longer**, have a **Very High** or **Extremely High** risk and return profile, and are unlikely to need to access their capital within **One Week** of request.

TMD Indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red and green rating methodology:

Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in Column 1 is likely to be in the target market for this product.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of minor allocation). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a balanced or moderate diversified portfolio with a minor allocation to growth assets. In this case, a product with a High risk/return profile may be consistent with the consumer's objectives for that minor allocation notwithstanding that the risk/return profile of the consumer as a whole is Medium. In making this assessment, distributors should consider all features of a product (including its key attributes).

The FSC has provided more detailed guidance on how to take this portfolio view for diversification, available on the FSC website. <https://www.fsc.org.au/>. This guidance only applies where a product is held as part of an appropriately diversified portfolio.

Target Market

Appropriateness

The Issuer has assessed this product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described below. This is due to the features of this product likely being suitable for consumers with the attributes identified with a green indicator.

Consumer attributes	TMD indicator
Consumer's investment objective	TMD indicator
Capital Growth	In target market
Capital Preservation	Not in target market
Income Distribution	Not in target market
Consumer's intended product use (% of Investable Assets)	TMD indicator
Solution/Standalone (up to 100%)	Not in target market
Major Allocation (up to 75%)	Not in target market
Core Component (up to 50%)	Not in target market
Minor Allocation (up to 25%)	Not in target market
Satellite Allocation (up to 10%)	In target market
Consumer's investment timeframe	TMD indicator
7 years or longer	In target market
Consumer's Risk (ability to bear loss) and Return profile for the relevant portion of the consumer's portfolio*	TMD indicator
Low	Not in target market
Medium	Not in target market
High	Not in target market
Very High	In target market
Extremely High	In target market
Consumer's need to access capital	TMD indicator
Within One Week of request	In target market
Within One Month of request	In target market
Within Three Months of request	In target market
Within One Year of request	In target market
Within Five Years of request	In target market
Within Ten Years of request	In target market

*Refer to Investment products and diversification section of the TMD above.

About the Fund

Investment Objective: Aims to provide investors with long term capital growth via an investment in a portfolio of quality Australian microcap companies. Microcap companies are defined as companies with a market capitalisation or free float of less than \$300m on acquisition.

Product Description: The Fund has the following key attributes:

- * Designed to achieve the Fund's objective by adopting a bottom-up selection approach to investing where the decision to buy or sell is based on fundamental quality and valuation.
- * Designed within a framework that is independent of a benchmark in terms of stock and sector weights.

Portfolio Diversification: The Fund is comprised of 70-100% Australian shares and 0-30% cash. As the Fund provides exposure to Microcap Australian shares only, its portfolio diversification has been assessed as 'Low' and most appropriate as a satellite allocation as a % of investable assets.

Risk Level: The Fund's standard risk measure (SRM) is 6 (High), which is reflected in the Product Disclosure Statement. The SRM is based on industry guidance and is not a complete assessment of all forms of investment risk.

Specific risks associated with this fund include:

Microcap Liquidity Risk: Shares in smaller and microcap companies may trade less frequently and in smaller volumes and therefore may be affected by liquidity risk to a greater degree than shares in larger companies.

Asset class concentration Risk: Investing in a fund with exposure to predominantly one asset class such as Australian shares may lead to more volatile returns than investing in a fund with a more diversified portfolio with exposure to multiple asset classes.

Drawdown Risk: The risk of a steep decline in value of an investment portfolio from a relative peak. Any time taken to recover a drawdown can vary considerably due to the nature of the underlying assets, the investment strategy, market conditions and the size of the drawdown.

Smaller Company Risk: When investing in a company considered small by market capitalisation, an investor is exposed to many risks to which the company is exposed and this may impact the value of the security. The company may also be a new participant with limited public information or involve new concepts which may be speculative. In addition, the market price of a smaller company's securities may fluctuate in an unrelated or disproportionate way to the operating performance of the company.

For more information on risks of the Fund please refer to the Product Disclosure Statement.

The Fund is most suitable for consumers who have a very high or extremely high-risk return profile and:

- * are seeking a fund that has low diversification
- * are comfortable with the aforementioned specific risks associated with the Fund

Suggested Length of Investment: The Fund may be suitable for consumers who seek to invest their capital for a minimum timeframe of seven years.

Access to Capital: Withdrawal requests can be made daily, and must be received, accepted by the Fund's unit registry prior to 3pm (Sydney time) on a Business Day to be processed using that day's exit price if received after 3pm, it will be processed using the next available price. Proceeds from your withdrawal will typically be available within 3-5 business days but can be up to 14 business days (e.g. during distribution periods) from when we have accepted the request, given normal operating conditions. Please refer to the PDS for full details on the withdrawal conditions for the Fund and other factors that may delay or impact the payment of proceeds.

Distribution information

Distribution conditions / restrictions

Channel	Distribution Condition	Rationale
Directly (and non-advised)	Directly (and non-advised) – via the issuer’s physical application forms. For a consumer to access the product directly, they must read and accept the PDS. For these consumers applying directly (via a physical application form) and without an adviser, the consumer will be required to complete a series of questions in the application form in order for the issuer to understand whether the consumer is within the target market, these questions will align to the attributes in this TMD. Following this, if the consumer has been assessed as being unlikely to be in the target market, the issuer representative will inform the consumer. Based on responses to certain knock-out questions this application will be rejected. If the consumer has been assessed as being likely to be in the target market, the issuer will accept the application in accordance with the requirements of the PDS. Only representatives of the issuer that have undergone internal training in respect of the Fund and the Fund’s target market and who have demonstrated knowledge, competence and experience in respect of the Fund and the Fund’s target market are able to promote and distribute this product	It has been determined that the distribution conditions and restrictions will make it likely that customers who purchase the product are in the class of customers for which it has been designed. We consider that the distribution conditions are appropriate and will assist distribution in being directed towards the target market for whom the product has been designed. The issuer will monitor such situations to determine if there are significant dealings outside of the target market.
Directly (and advised)	Via financial advisers where consumers have received personal advice. For a consumer to access the product directly, they must read and accept the PDS. Distributors should only engage in retail product distribution conduct if they are reasonably satisfied that distribution is necessary to implement personal advice given to the consumer.	The Issuer considers that the distribution condition will make it likely that consumers who acquire the product will be in the target market for the product, or the product will otherwise be appropriate for them, because: Persons providing personal advice must consider the consumer’s individual circumstances and comply with the best interests’ duty and related obligations under Pt 7.7A of the Corporations Act
Distribution channels such as investment or super platforms or wrap products (platforms), Investor directed portfolio service (IDPS), IDPS-like scheme, nominee or custody service or any other trading platform.	This Product is available to persons investing through investment or super platforms, or wrap products (platform), an investor directed portfolio service (IDPS), IDPS-like scheme, nominee or custody service or any other trading platform.	The issuer of each platform has its own obligations as an issuer and distributor to take reasonable steps that will or are reasonably likely to result in retail product distribution being consistent with this TMD.

Distributor reporting requirements

Reporting requirement - All distributors	Reporting period	Method of reporting (using FSC data standards where practicable)
Complaints (as defined in section 994A(1) of the Act) relating to the product design, product availability and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	Within 10 business days following the end of a calendar quarter.	Information to be sent to DDOmail@perpetual.com.au
Significant dealings outside the target market determination.	As soon as practicable but no later than 10 business days after becoming aware of a significant dealing.	Information to be sent to DDOmail@perpetual.com.au

Review Triggers

- Determination by the issuer of an ASIC reportable Significant Dealing.
- Key attributes have not performed as disclosed by a material degree and for a material period.
- Material deviation of performance from benchmark or objective over sustained period.
- Material change to key attributes, fund investment objective and/or fees.
- Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.
- The use of Product Intervention Powers, regulator orders or directions that affects the product.

Maximum period for review of this TMD

Mandatory review periods	
Review period	Maximum period for review
Initial review	1 year and 3 months (Complete)
Subsequent / periodic reviews	2 years and 3 months

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed or expected to generate capital return over the investment timeframe. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product designed or expected to have low volatility and minimise capital loss. The consumer prefers exposure to defensive assets that are generally lower in risk and less volatile than growth investments (this may include cash or fixed income securities).
Income Distribution	The consumer seeks to invest in a product designed or expected to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (this may include high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (up to 100%)	The consumer may hold the investment as up to 100% of their total investable assets. The consumer is likely to seek a product with very high portfolio diversification (see definition below).
Major Allocation (up to 75%)	The consumer may hold the investment as up to 75% of their total investable assets. The consumer is likely to seek a product with at least high portfolio diversification (see definition below).
Core Component (up to 50%)	The consumer may hold the investment as up to 50% of their total investable assets. The consumer is likely to seek a product with at least medium portfolio diversification (see definition below).
Minor Allocation (up to 25%)	The consumer may hold the investment as up to 25% of their total investable assets. The consumer is likely to seek a product with at least low portfolio diversification (see definition below).
Satellite Allocation (up to 10%)	The consumer may hold the investment as up to 10% of the total investable assets. The consumer may seek a product with very low portfolio diversification (see definition below). Products classified as extremely high risk are likely to meet this category only.
Investable Assets	Those assets that the investor has available for investment, excluding the residential home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)	
Very Low	The product provides exposure to a single asset (for example, a commercial property) or a niche asset class (for example, minor commodities, crypto-assets or collectibles).
Low	The product provides exposure to a small number of holdings (for example, fewer than 25 securities) or a narrow asset class, sector or geographic market (for example, a single major commodity (e.g. gold) or equities from a single emerging market economy).
Medium	The product provides exposure to a moderate number of holdings (for example, up to 50 securities) in at least one broad asset class, sector or geographic market (for example, Australian fixed income securities or global natural resources).
High	The product provides exposure to a large number of holdings (for example, over 50 securities) in multiple broad asset classes, sectors or geographic markets (for example, global equities).
Very High	The product provides exposure to a large number of holdings across a broad range of asset classes, sectors and geographic markets with limited correlation to each other.
Consumer's intended investment timeframe	
Minimum	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the Fund is likely to be achieved.

Term	Definition
Consumer's Risk (ability to bear loss) and Return profile	
<p>This TMD uses the Standard Risk Measure (SRM) to estimate the likely number of negative annual returns for this product over a 20 year period, using the guidance and methodology outlined in the Standard Risk Measure Guidance Paper For Trustees (note the bands in the SRM guidance differ from the bands used in this TMD). However, SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return (including under conditions of market stress) or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. The SRM methodology may be supplemented by other risk factors. For example, some products may use leverage, derivatives or short selling; may have liquidity or withdrawal limitations; may have underlying investments with valuation risks or risks of capital loss; or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.</p> <p>A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.</p>	
Low	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a conservative or low risk appetite, • seeks to minimise volatility and potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)), and • is comfortable with a low target return profile. <p>The consumer typically prefers stable, defensive assets (such as cash).</p>
Medium	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a moderate or medium risk appetite, • seeks low volatility and potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)), and • is comfortable with a moderate target return profile. <p>The consumer typically prefers defensive assets (for example, fixed income).</p>
High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a high risk appetite, • can accept high volatility and potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 5 or 6)), and • seeks high returns (typically over a medium or long timeframe). <p>The consumer typically prefers growth assets (for example, shares and property).</p>
Very High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a very high risk appetite, • can accept very high volatility and potential losses (e.g. has the ability to bear 6 to 7 negative returns over a 20 year period (SRM 6 or 7)), and • seeks to maximise returns (typically over a medium or long timeframe). <p>The consumer typically prefers high growth assets (such as high conviction portfolios, hedge funds, and alternative investments).</p>
Extremely High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has an extremely high risk appetite, • can accept significant volatility and losses, and • seeks to obtain accelerated returns (potentially in a short timeframe). <p>The consumer seeks extremely high risk, speculative or complex products which may have features such as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes (for example, crypto-assets or collectibles).</p>
Consumer's need to access capital	
<p>This consumer attribute addresses the likely period of time between the making of a request for redemption/withdrawal (or access to investment proceeds more generally) and the receipt of proceeds from this request under ordinary circumstances.</p>	

Term	Definition
Distributor reporting	
Significant Dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product's risk rating or access to capital timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red and/or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p> <ul style="list-style-type: none"> • it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the quarter, • the consumer's intended product use is solution/standalone, • the consumer's intended product use is core component or higher and the consumer's risk/return profile is low, or • the relevant product has a green rating for consumers seeking extremely high risk/return.
