

Perpetual Investment Funds

PERPETUAL INDUSTRIAL SHARE FUND

May 2026

FUND FACTS

Investment objective: Aims to provide long-term capital growth and regular income through investment predominantly in quality Australian industrial shares.

FUND BENEFITS

Provides investors with the potential for capital growth and consistent, tax effective income through the active management of quality industrial shares. Investors have been benefitting from this strategy since 1966.

FUND RISKS

All investments carry risk and different strategies may carry different levels of risk. The relevant product disclosure statement or offer document for a fund should be considered before deciding whether to acquire or hold units in that fund. Your financial adviser can assist you in determining whether a fund is suited to your financial needs.

Benchmark: S&P/ASX 300 Industrial Accum. Index

Inception Date: December 1996

Size of Portfolio: \$880.88 million as at 31 Mar 2026

APIR: PER0046AU

Management Fee: 0.99%*

Investment style: Active, fundamental, bottom-up, value

Suggested minimum investment period: Five years or longer

NET PERFORMANCE - periods ending 31 May 2026

	Fund	Benchmark #	Excess
1 month	-0.10	-1.32	+1.22
3 months	-5.03	-6.39	+1.36
1 year	-8.33	-6.38	-1.95

MARKET COMMENTARY

Australian equities edged higher in May, with the S&P/ASX300 advancing +1.25% against a backdrop of geopolitical uncertainty and a pivotal domestic policy shift. The federal budget introduced significant changes to capital gains tax and negative gearing arrangements from July 2027, generating sector rotation and weighing on bank sentiment. Global markets continued to track developments in the Middle East, with oil price volatility an uncertain outlook a dominant driver of equity moves. On the macro side, the RBA raised the cash rate 25 basis points to 4.35 %, citing persistent inflation pressures amplified by elevated oil prices. April employment data disappointed, with the unemployment rate rising to 4.5 %, while headline CPI eased to 4.2% – aided by the government's fuel excise cut – though trimmed mean inflation ticked higher to 3.4%, keeping rate expectations unsettled through month end.

PORTFOLIO COMMENTARY

The portfolio's largest overweight positions include Washington H. Soul Pattinson, Goodman Group and EVT Limited. Conversely, the portfolio 's largest relative underweight positions include Macquarie Group and Telstra, both of which were not held, and Wesfarmers.

McMillan Shakespeare was a strong contributor in May, returning 15.8% for the month. The federal budget provided regulatory clarity on the existing FBT exemption for EVs, which is a significant positive for the novated leasing industry, with the current legislation remaining largely unchanged for the next three years before being wound back from 1 April 2029. This gives industry participants a clear and stable operating runway. Separately, the spike in oil prices arising from the Middle East conflict appears to have acted as a catalyst for a step change in EV purchases. This is beginning to show in new vehicle delivery data, though the shift from ICE to EV is perhaps most evident in feedback from dealers on the ground. Notably, EVs have historically attracted novated leasing penetration rates of around 50 %, compared to just 5–10% for ICE vehicles – a structural dynamic that positions novated lease providers to benefit disproportionately from the ongoing transition. We believe the industry is entering a period of strong structural growth and that McMillan Shakespeare is well placed to capture it. The stock remains attractively priced at 11–12x earnings, the balance sheet is in good shape and management continues to demonstrate a high standard of execution.

Following the onset of the US Iran conflict, sentiment turned negative for cyclical names such as James Hardie, as the conflict threatened to inflate and sustain affordability headwinds. By the end of May, however, a combination of JHX 's FY26 full year results and easing geopolitical tensions saw the stock return 9.7% for the month and contribute strongly to the portfolio. We continue to believe JHX remains undervalued relative to a mid cycle environment – a mispricing we attribute to near term sentiment weighing heavily on the multiple rather than any structural deterioration in the business. The fundamental backdrop supports a re rating: the US housing market remains undersupplied, and a decade of productivity outperformance relative to developed economy peers has supported real wage growth and household purchasing power, providing a constructive medium term outlook for housing demand. As a manufacturing business with a largely fixed cost base, JHX carries significant operating leverage offering meaningful upside as sentiment normalises and the multiple re rates toward mid cycle.

Eagers Automotive was a top portfolio detractor, returning –12.96% for the month. At its AGM trading update on 27 May, APE issued H1 CY26 guidance that came in well below expectations, prompting full year consensus PBT downgrades of approximately 5%. The stock fell 9.71% the following session. More broadly, APE has faced headwinds from softening new vehicle sales sentiment, driven by a deteriorating macroeconomic outlook in the wake of the US Iran conflict. Despite near term pressures, we remain constructive on the longer term thesis. APE 's scale provides a structural competitive advantage, and its exposure to key new energy vehicle brands – where it holds greater than 33% market share – positions it well to benefit from continued strong electric vehicle demand. Looking further ahead, APE has recently completed the acquisition of a high performing dealership group in Canada, where management is well placed to replicate the operational model that has driven its success in Australia.

May proved a difficult month for A2 Milk Company. A voluntary US infant formula recall on 1 May, citing cereulide contamination, triggered a 9.9% single day share price fall, with the stock declining steadily thereafter to return –24.15% for the month. The direct financial impact was modest (approximately 0.2% of FY26 infant formula sales), however markets were spooked by the risk of brand damage in China. The recall also compounded a pre existing supply issue: in mid April, A2M had already cut FY26 revenue and EBITDA margin guidance following customs clearance delays and low Synlait safety stock. Subsequent analyst downgrades added further pressure. Looking ahead, we believe the long term China IMF share gain story remains intact and expect supply related headwinds to ease as the Pokeno facility ramps up in 1H27. Ownership of the facility and its China label registrations brings manufacturing and regulatory control in house, reducing Synlait dependency and strengthening supply chain resilience into China. Further downside risk is cushioned by a robust balance sheet (NZ\$896.9m in net cash and 91% cash conversion).

OUTLOOK

Markets may be traversing the most acute period of uncertainty in recent memory. Investor sentiment lurches almost daily on Middle East negotiation headlines, while supply anxiety around energy markets has reignited fears not seen in years. Closer to home, Australian consumers are navigating a tough budget and auction clearance rates have fallen sharply – all this coming after years of steadily rising cost of living pressures. Signs of shaky confidence are also emerging in private markets, with some funds moving to limit redemptions. Yet set against these headwinds, the global technology boom rolls on and US equities continue to trade at record levels. How these competing realities resolve is the central question. As always we own a balance of quality as well as value to mitigate risk of either scenario. Active managers who hold discipline on valuation are positioned to benefit as clarity emerges – and periods of peak uncertainty have historically marked the most consequential entry points for long term investors.

Benchmark prior to 1/4/2000 was the ASX All Industrials Accumulation Index. From 1/4/2000 to current the benchmark is S&P/ASX 300 Industrials Accumulation Index.
